- Express
- REST-APIs
- Docker (Compose)
- MySQL
- PostgreSQL
- MongoDB
- Git / GitHub
- Linux
- Amazon Web Services (AWS)
- Android mobile development
- Kotlin

I am a Web Developer who loves combining analytical structure with creative detail. My eight-year background in System Administration gave me a strong foundation in security and reliability, but I believe the best work happens with open communication and a supportive team. Outside of coding, you'll find me hiking mountains to build stamina or creating floral arrangements to sharpen my patience - skills that I bring back to every project to stay focused and solution-oriented.

PROFESSIONAL EXPERIENCE
